

FROM CHALAIS TO THE CHALETS... PASSING BY...

In a spirit of discovery, a concept of educational walks was devised in 2014 to draw on the riches of the village of Chalais. The backbone of the project, a footpath linking Chalais to the Crêt du Midi, serves as its vertical axis. Dubbed "From Chalais to the chalets", it passes through five vegetation zones and crosses 12 thematic trails known as "... passing by..." that makes up the horizontal axes. Hardier souls may choose to climb the path, an 1800m rise in altitude. The other itineraries are accessible by cable car, bus, car, bicycle or on foot.

The project consists of a total of 12 educational trails, of which 6 are currently open to walkers, and a further 2 will be completed by the end of 2016. The work is scheduled for completion in 2018.
